#### MARNING - USER RESPONSIBILITY

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.

The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.

To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

#### Offer of Sale

The items described in this document are hereby offered for sale by Parker-Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated in the detailed "Offer of Sale" elsewhere in this document or available at <a href="https://www.parker.com/ipdus">www.parker.com/ipdus</a>.

Actual pressure rating will be determined by the valve configuration, such as body material, seat material, etc. Contact the factory for more information.

#### Introduction

Parker manually, pneumatically, and electrically actuated two-way B Series Ball Valves provide quick 1/4 turn on-off control of fluids utilized in process and instrumentation applications. A broad selection of valve body, seat, and seal materials provide a wide range of pressures and temperatures at which the valve may be used.

#### **Features**

- Free floating ball design provides seat wear compensation.
- Available in 316 stainless steel and brass construction. Monel® Alloy 400 and Hastelloy® C-276 construction available upon request.
- ▶ Micro-finished ball provides a positive seal.
- Straight through flow path for minimum pressure drop.
- ► Bi-directional flow.
- ▶ Wide variety of US Customary and SI ports.
- ▶ 90° actuation.
- ▶ Panel mountable.
- Adjustable PTFE stem seal can be maintained in-line.
- ► Handle indicates flow direction.
- ► Low operating torques.
- ► Positive handle stops.
- ► Color coded handles.
- Optional pneumatic and electric actuation.
- ▶ Optional live-loaded PTFE stem seals.
- ► Optional non-adjustable O-ring stem seals.
- Optional upstream and downstream drain models.
- ▶ Optional stainless steel and extended handles.

# **Specifications**

#### **Pressure Ratings:**

| Material            | CWP                  | with PTFE Seats     |
|---------------------|----------------------|---------------------|
| 316 Stainless Steel | 6000 psig (414 bar)* | 1500 psig (103 bar) |
| Brass               | 3000 psig (207 bar)  | 1500 psig (103 bar) |
| Monel® Alloy 400    |                      |                     |
| B2 and B6:          | 3000 psig (207 bar)  | 1500 psig (103 bar) |
| B8:                 | 2000 psig (138 bar)  | 1500 psig (103 bar) |
| Hastelloy® C-276    |                      |                     |
| B2 and B6:          | 4000 psig (276 bar)  | 1500 psig (103 bar) |
| B8:                 | 3000 psig (207 bar)  | 1500 psig (103 bar) |

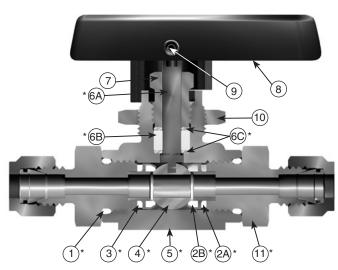

<sup>\*</sup> B6 Series: 6000 psig rating or 4400 psig (303 bar) CWP B8 Series: 6000 psig rating or 4000 psig (276 bar) CWP

#### **Pressure Rating and Tubing Selection**

For working pressures of A-LOK® and CPI™ tube connections, please see the Instrument Tubing Selection Guide (Bulletin 4200-TS), found in the Technical Section of the Parker Instrumentation Process Control Binder, or the Parker Instrument Fitting Installation Manual (Bulletin 4200-B4).

For working pressures of valves with external or internal pipe threads, please see Catalog 4260, Instrumentation Pipe Fittings.

<sup>\*</sup> Tested in accordance with ISA S75.02. Gas flow will be choked when  $P_1$ -  $P_2/P_1$ =  $x_T$ .

Dimensions in inches/millimeters are for reference only, subject to change.

<sup>†</sup> For CPI™ and A-LOK®, dimensions are measured with nuts in the finger tight position

## Introduction

Parker manually, pneumatically, and electrically actuated three-way B Series Ball Valves may be used as diverting or selecting valves for fluids utilized in process and instrumentation applications. The standard three-way diverter valve is designed to accept media through the bottom port and direct it out of two outlet ports. When equipped with spring-loaded seats, the three-way valve may be used as a selector valve, alternately accepting media from either of two inlet sources (side ports) and directing it through a single outlet (bottom port).

#### **Features**

- Available in 316 stainless steel and brass construction. Monel® Alloy 400 and Hastelloy® C-276 construction available for Diverter Valves upon request.
- ▶ Micro-finished ball provides a positive seal.
- ▶ Wide variety of US Customary and SI ports.
- ▶ 180 degree actuation.
- ► Panel mountable.
- Adjustable PTFE stem seal can be maintained in-line.
- ► Handle indicates flow direction.
- Low operating torques.
- ► Positive handle stops.
- ► Color coded handles.
- ▶ Optional pneumatic and electric actuation.
- ▶ Optional live-loaded PTFE stem seals.
- Optional non-adjustable O-ring stem seals.
- ▶ Optional stainless steel and extended handles.

# **Diverter Valve Specifications**

#### Pressure Ratings with bottom port as inlet:

| Material            | CWP                  | with PTFE Seats     |
|---------------------|----------------------|---------------------|
| 316 Stainless Steel | 6000 psig (414 bar)* | 1500 psig (103 bar) |
| Brass               | 3000 psig (207 bar)  | 1500 psig (103 bar) |
| Monel® Alloy 400    |                      |                     |
| B2 and B6:          | 3000 psig (207 bar)  | 1500 psig (103 bar) |
| B8:                 | 2000 psig (138 bar)  | 1500 psig (103 bar) |
| Hastelloy® C-276    |                      |                     |
| B2 and B6:          | 4000 psig (276 bar)  | 1500 psig (103 bar) |
| B8:                 | 3000 psig (207 bar)  | 1500 psig (103 bar) |

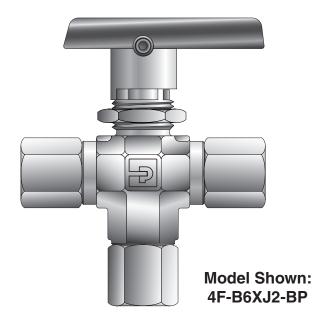

B6 Series: 6000 psig rating or 4400 psig (303 bar) CWP B8 Series: 6000 psig rating or 4000 psig (276 bar) CWP

#### **Pressure Rating and Tubing Selection**

For working pressures of A-LOK® and CPI™ tube connections,

#### Pressure Rating with side ports as inlet:

150 psig (10 bar)

# **Selector Valve Specifications**

(Spring Loaded – B6 and B8 models only)

#### Pressure Rating with bottom port as inlet:

| 316 Stainless Steel | 6000 psig (414 bar) CWP* |
|---------------------|--------------------------|
| Brass               | 3000 psig (207 bar) CWP  |

#### Pressure Rating with side ports as inlet:

316 Stainless Steel and Brass....3000 psig (207 bar) CWP

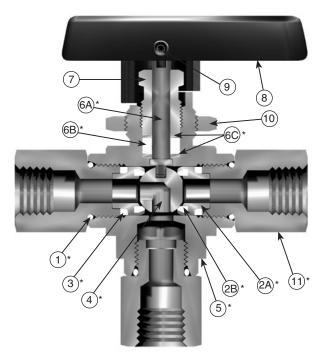

#### **Pressure Rating and Tubing Selection**

For working pressures of A-LŌK® and CPI™ tube connections, please see the Instrument Tubing Selection Guide (Bulletin 4200-TS), found in the Technical Section of the Parker Instrumentation Process Control Binder, or the Parker Instrument Fitting Installation Manual (Bulletin 4200-B4).

For working pressures of valves with external or internal pipe threads, please see Catalog 4260, Instrumentation Pipe Fittings.

- \* Wetted Parts.
- $^{\star\star}$  Optional stem seal and body seal materials are described in the How to Order section.
  - Lubrication: Perfluorinated Polyether.
- \*\*\*The lower stem washer material is PEEK for B8 Selector Valves. Lubrication: Perfluorinated polyether.

 $<sup>^{\</sup>star}~$  Tested in accordance with ISA S75.02. Gas flow will be choked when P1- P2/ P1= xT.

Dimensions in inches/millimeters are for reference only, subject to change.

<sup>†</sup> For CPI™ and A-LOK®, dimensions are measured with nuts in the finger tight position

# Pressure vs. Temperature

Note: To determine MPa, multiply bar by 0.1

**Note:** This Pressure versus Temperature chart reflects the maximum temperature range of indicated materials.

When combining seat and seal materials, the most restrictive temperature rating of the seats or seals becomes the limiting factor on valve temperature range.

Elastomeric stem packing and seals are recommended if the application subjects the valve to thermal cycling.

Please see pages 2 and 4 for maximum pressure ratings.

#### **Temperature Ratings:**

| PTFE                      | -65°F | to | 350°F | (-54°C | to | 177  | °C) |
|---------------------------|-------|----|-------|--------|----|------|-----|
| PCTFE                     | -65°F | to | 350°F | (-54°C | to | 177  | °C) |
| PEEK                      | -65°F | to | 450°F | (-54°C | to | 232  | °C) |
| Nitrile Rubber            | -40°F | to | 250°F | (-40°C | to | 1219 | °C) |
| Fluorocarbon Rubber       | -15°F | to | 450°F | (-26°C | to | 232  | °C) |
| Ethylene Propylene Rubber | -65°F | to | 300°F | (-54°C | to | 149  | °C) |
| Highly Fluorinated        |       |    |       |        |    |      |     |

Fluorocarbon Rubber ....... -15°F to 200°F (-26°C to 93°C)

## Flow Calculations with 1000 psig (69 bar) Inlet Pressure

16mm CPI™

# **How to Order (Continued)**

#### **Examples: Two-Way Valves**

Describes a B6L ball valve with a 1/4" CPI<sup>™</sup> end connection for port 1 and a 1/4" female NPT end connection for port 2, PTFE seats, PTFE stem and body seals, brass construction, with a panel mounting nut

Describes a B8L ball valve with a 1/2" A-LOK® end connections for ports 1 and 2, PTFE seats, Nitrile rubber stem and body seals, stainless steel construction, with a panel mounting nut.

\*Note: If ports 1 and 2 are the same, eliminate the port 2 designator.

Describes a B2L ball valve with 3mm A-LOK® end connections for ports 1 and 2, PCTFE seats, fluorocarbon rubber body seals, PCTFE packing, stainless steel construction, with a panel mounting nut. \*Note: If ports 1 and 2 are the same, eliminate the port 2 designator.

### **Examples: Three-Way Diverter Valves**

Describes a B6X ball valve with 1/4" CPI™ end connections for side ports 1 and 2, 1/4" female NPT end connection for bottom port 3, PCTFE seats, fluorocarbon rubber stem and body seals, brass construction, and a panel mounting nut.

Describes a B2X ball valve with 1/8" CPI™ end connections for ports 1, 2, and 3, PTFE seats, PTFE stem and body seals, stainless steel construction, and a panel mounting nut.

\*Note: If ports 1, 2, and 3 are the same, eliminate the port 2 and port 3 designators.

### **Examples: Three-Way Selector Valves**

Describes a B6X ball valve with 1/4" male NPT end connections for side ports 1 and 2, 1/4" female NPT end connection for bottom port 3, spring-loaded PCTFE seats, ethylene propylene rubber stem and body seals, stainless steel construction, and a panel mounting nut.

Describes a B8X ball valve with 1/2" A-LOK® end connections for ports 1, 2, and 3, spring-loaded PCTFE seats, Nitrile rubber body seals, live loaded PTFE packing, stainless steel construction, and a panel mounting nut.

\*Note: If ports 1, 2, and 3 are the same, eliminate the port 2 and port 3 designators.

## **Options**

# **Actuator Options**

Double Acting (61AD)
Pneumatic Actuator

Spring Returns (61AC, 61S & AO)
Pneumatic Actuator

70, 80 & 90 Series Electric Actuator

**O-Ring Stem Seals** 

**Live-Loaded Stem Seals** 

#### Two-Way Valve Upstream and Downstream Drain Options

For draining upstream or downstream media on two-way valves at pressures below 150 psig (10 bar), add the suffix **–VBU** (Vented Ball Upstream) or **–VBD** (Vented Ball Downstream). Example: 4Z-B6LJ-SSP-VBU. This option is also suitable to vent the ball cavity in vacuum applications. For pressures up to 3,000 psig (207 bar), select **S2** or **SPKR** spring-loaded seats and add the suffix **–VBU** (Vented Ball Upstream) or **–VBD** (Vented Ball Downstream). Example: 4Z-B6L**S2**-SSP-**VBU** 

Note: VBD and VBU are ball cavity vents only.

| How to Order Options  | Examples                                       |
|---|--|
| <b>Lock-Out Devices:</b> Add the suffix LD to the end of the part number to order directly on the valve. For field installation, simply substitute the correct valve series number after LD.  | 4F-B6LJ2-BN-SSP <b>-LD</b><br><b>LD-B8L</b>    |
| <b>Colored Lever Handles:</b> Add the designator corresponding to the correct handle as a suffix to the part number (black is standard). $\mathbf{W} = \text{white}$ , $\mathbf{B} = \text{blue}$ , $\mathbf{G} = \text{green}$ , $\mathbf{R} = \text{red}$ , $\mathbf{Y} = \text{yellow}$ .  | M6A-B6XPKR-SSP- <b>G</b>                       |
| Colored Round Handles: Add the designator corresponding to the correct handle as a suffix to the part number.  S = Black, S-W = white, S-B = blue, S-G = green, S-R = red, S-Y = yellow.  NOTE: Round handles are not recommended for B8 valves with PEEK seats.  | M6A-B6XPKR-SSP- <b>S-G</b>                     |
| Metal Oval Handles: Add the designator corresponding to the correct handle as a suffix to the valve part number.  OVSS = stainless steel, SA = oval aluminum.  NOTE: Not available in size 2.   | 8F-B8LPKR-SSP <b>-OVSS</b>                     |
| Stainless Steel Handles: Add the suffix -ST to the end of the part number (B6 and B8 only).   | 4F-B6LJ-SSP <b>-ST</b>                         |
| Pneumatic Actuators: For detailed actuator information, refer to the Pneumatic Actuators section of this catalog. For factory assembly, add the actuator part number as the suffix to the valve part number. For field installation, specify the actuator desired.  The appropriate mounting hardware may be obtained by adding the valve series and actuator size to the prefix MK | 2F-B2XJ2-V-SSP-61ACX-2<br>61ACX-2<br>MK-B2X-61 |
| Electric Actuators: For detailed actuator information refer to the Electric Actuators section of this catalog. For factory assembly, add the actuator part number as the suffix to the valve part number. For field installation, specify the actuator desired.  The appropriate mounting hardware may be obtained by adding the valve series and actuator series to the prefix MK  | 8A-B8LPKR-BN-SS-71A<br>71A<br>MK-B8L-70        |
| Oxygen Cleaning: Add the suffix -C3 to the end of the part number to receive valves cleaned and asembled for oxygen service in accordance with Parker Specification ES8003.   | 4A-B6LJ-EPR-SSP <b>-C3</b>                     |
| <b>Electron Beam Welded End Connections:</b> For tamper resistant valves, add the suffix <b>-EBW</b> to the end of the part number of stainless steel valves to have end connections electron beam welded.  | M6A-B6LSPKR-V-SSP <b>-EBW</b>                  |
| Fillet Weld End Connections: For seal welded valves, add the suffix -FW to the end of the part number of the stainless steel valves to have the end connections seal welded to the body.  | 8Z-B8LJ2-SSP <b>-FW</b>                        |
| <b>Grounding Spring:</b> To obtain B6 and B8 series valves with a grounding spring, add the suffix <b>-SPG</b> to the end of the part number.   | 8A-B8LJ2-SSP <b>-SPG</b>                       |
| How to Order Maintenance Kits   |  |
| Colored Round Handle Kits: Series-Handle-Color. (Example consists of a green handle and handle screw.) NOTE: Stainless Steel kits not available in size 2.  | B6-RD-HANDLE-GREEN                             |
| Stainless Steel Handle Kits: Series-Handle-SS. (Example consists of a stainless steel handle and handle screw.)  Colored Lever Handle Kits: Series-Handle-Color. (Example consists of a red handle and handle screw.)   | B8-HANDLE-SS<br>B6-HANDLE-RED                  |

## Two-way Valve Seal Kits:

PTFE Stem Seal Kits: Kit-Valve Series and Seat Material-Body Material.

KIT-B2LJ-SS

(Consists of one PTFE stem seal, two stem seal washers, two encapsulated PTFE ball seats, two end connector PTFE seals, one assembly mandrel, maintenance instructions.)

Elastomeric Stem Seal Kits: Kit-Valve Series and Seat Material-Elastomer Material-Body Material. KIT-B2LJ2-BN-SS (Consists of two stem seal Nitrile rubber O-rings, two PTFE back-up rings, two stem seal washers, two encapsulated PCTFE ball seats, two end connector Nitrile rubber O-ring seals, two seat retainer Nitrile rubber O-ring seals, stem glands and maintenance instructions.)

#### **Diverter Valve Seal Kits:**

PTFE Stem Seal Kits: Kit-Valve Series and Seat Material-Body Material.

KIT-B6XPKR-SS

(Consists of one PTFE stem seal, two stem seal washers, two encapsulated PEEK ball seats, three end connector PTFE seals, one assembly mandrel, maintenance instructions.)

**Elastomeric Stem Seal Kits:** Kit-Valve Series and Seat Material-Elastomer-Body Material.

KIT-B6XJ-V-SS

(Consists of two stem seal fluorocarbon rubber O-rings, two PTFE back-up rings, two stem seal washers, two encapsulated PTFE ball seats, three end connector fluorocarbon rubber O-ring seals, two seat retainer fluorocarbon rubber O-ring seals, stem glands and maintenance instructions.)

#### **Selector Valve Seal Kits:**

PTFE Stem Seal Kits: Kit-Valve Series and Seat Material.

KIT-B6XS2

(Consists of one PTFE stem seal, two stem seal washers, two encapsulated spring-loaded PCTFE ball seats, two seat retainer fluorocarbon rubber O-rings, three end connector PTFE seals, one assembly mandrel, maintenance instructions.)

Elastomeric Stem Seal Kits: Kit-Valve Series and Seat Material-Elastomer.

KIT-B6XSPKR-\

(Consists of two stem seal fluorocarbon rubber O-rings, two PTFE back-up rings, two stem seal washers, two encapsulated spring-loaded PEEK ball seat assemblies, three end connector fluorocarbon O-ring seals, two seat retainer fluorocarbon rubber O-rings, stem glands and maintenance instructions.)

#### **Live-loaded Seal Kits:**

Kit-Valve Series and Seat Material-Seal Material-Body Material.

KIT-B6LJ2-BNLT-SS

(Consists of one live-loaded PTFE stem packing, two packing springs (B8 series valves have four springs), three packing washers, two PCTFE encapsulated ball seats, two Nitrile rubber end connector O-ring seals, two Nitrile rubber seat retainer O-ring seals, maintenance instructions.)

#### Introduction

Parker PR Series Plug Valves provide positive leak tight shut-off, high flow capacity, and quick quarter-turn operation in a compact attractive package. The patented blow-out resistant seat design offers reliable sealing technology at all operating pressures. In addition to on-off actuation, the plug design allows forward flow throttling. A selection of valve seat and seal materials may be chosen for media compatibility and performance over a broad range of temperatures. The pressure balanced atmospheric seals are backed by PTFE rings to enhance their performance and increase cycle life.

#### **Features**

- ▶ Patented blow-out resistant seat design
- ▶ Pressures up to 3,000 psig (207 bar) CWP
- ► Quarter-turn operation
- ► Reliable simple design
- ► Straight-through flow
- ▶ Stainless steel and brass construction
- ► Nitrile, ethylene propylene, fluorocarbon, and highly fluorinated fluorocarbon rubber seats and seals
- ▶ PTFE back-up rings on atmospheric seals
- ► Low operating torque
- ► Minimum pressure drop
- ► Throttling capability
- ► Positive handle stops
- Color coded fracture resistant nylon handles with directional flow indication
- ► Easy to service
- ▶ 100% factory tested
- Options include lock-out devices, downstream venting, and both stainless steel and T-bar handles

# **Specifications**

#### **Pressure Ratings:**

Normal Flow Direction: 3000 psig (207 bar) CWP Reverse Flow Direction: 150 psig (10 bar) Downstream Vent Option: 150 psig (10 bar)

#### **Materials of Construction**

| Item # | Part Description | Stainless Steel     | Brass        |  |  |  |  |
|--------|------------------|---------------------|--------------|--|--|--|--|
| 1      | Body             | ASTM B 16           |              |  |  |  |  |
| ı      | Бойу             | Type 316            | Alloy C36000 |  |  |  |  |
| 2      | Dlug*            | ASTM A 479          | ASTM B 16    |  |  |  |  |
|        | Plug*            | Type 316            | Alloy C36000 |  |  |  |  |
| 3      | Seat**           | Fluorocarbon        | Rubber       |  |  |  |  |
| 4      | O-Ring Seals**   | Fluorocarbon Rubber |              |  |  |  |  |
| 5      | Back-up Rings    | PTFE                |              |  |  |  |  |
| 6      | Handle           | Nylon 6/            | 6            |  |  |  |  |
| 7      | Handle Pin       | 316 Stainless       | Steel        |  |  |  |  |
| 8      | Body Pin         | 316 Stainless Steel | (not shown)  |  |  |  |  |
| 9      | Retaining Ring   | 316 Stainless Steel |              |  |  |  |  |

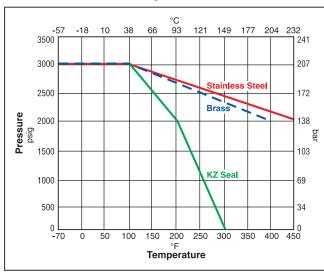

Plugs are PTFE color coated – Stainless steel plugs are black; Brass plugs are brown.

Model Shown: 4A-PR4-VT-SS

## **Pressure vs. Temperature**

Note: To determine MPa, multiply bar by 0.1

**Note:** This Pressure versus Temperature chart reflects the maximum temperature range of indicated body materials.

The temperature rating of the elastomer seals become the limiting factor on temperature range.

#### **Temperature Ratings**

| Material                                  | Temperature Rating                 |
|---|------------------------------------|
| Nitrile Rubber                            | -30°F to 225°F<br>(-34°C to 107°C) |
| Fluorocarbon Rubber                       | -10°F to 450°F<br>(-23°C to 232°C) |
| Highly Fluorinated<br>Fluorocarbon Rubber | -10°F to 300°F<br>(-23°C to 149°C) |
| Ethylene Propylene<br>Rubber              | -70°F to 275°F<br>(-57°C to 135°C) |

## Flow Calculations with 1000 psig (69 bar) Inlet Pressure

#### **Kits**

**Plug Kits** – Specify the combination of valve series, seal material, plug material, and handle color (if applicable). **Example: KIT-PR4-VT-SS-Y**. This kit consists of a PR4 stainless steel plug with fluorocarbon rubber seat and seal elastomers, PTFE back-up rings, yellow handle, and handle pin.

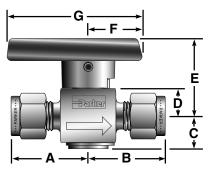

**Seal Kits** – Specify the combination of valve series and seal material.

**Example: KIT-PR4-BN**. This kit consists of a PR4 Nitrile rubber seat and seal elastomers and PTFE back-up rings.

<sup>\*\*</sup> Optional Seat and O-ring seal materials are available. Lubrication: Perfluorinated polyether

<sup>\*</sup> Tested in accordance with ISA S75.02. Gas flow will be choked when  $P_1$  -  $P_2$  /  $P_1$  =  $x_T$  .

Dimensions in inches/millimeters are for reference only, subject to change.

<sup>†</sup> For CPI™ and A-LOK®, dimensions are measured with nuts in the finger tight position.

#### **How to Order**

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

\*Note: If the inlet and outlet ports are the same, eliminate the outlet port designator.

The following example describes a PR Series rotary plug valve equipped with 1/4" CPI™ compression inlet and outlet ports, Nitrile seals, PTFE back-up rings, and stainless steel construction.

#### **Example:**

<sup>\*</sup>If the inlet and outlet ports are the same, eliminate the outlet port designator.

# **Options**

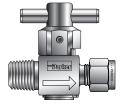

**Lock-Out Device** 

Used to lock the handle from accidental rotation in either the opened or closed position. To order the device with the valve, add the suffix **–LD** to the end of the part number.

Example and model shown: 4F-PR4-VT-B-LD.

To order the device separately, specify **LD-PR4** or **LD-PR6**.

**T-Bar Handle** 

An all metal bar stock design for higher strength and durability. Consists of a stainless steel pin and aluminum adapter. To order, add the suffix —T to the end of the part number.

Example and model shown: 4M4A-PR4-EPRT-SS-T.

**Downstream Venting** – As the valve is positioned from opened to closed, downstream pressure is released to atmosphere through a vent hole in the body and plug. The maximum recommended operating pressure for this option is 150 psig (10 bar). To order, insert **V** after PR in the model number. **Example:** 4A-PR**V**4-VT-B

**Colored Handles** – Black is the standard color. Add the designator corresponding to the correct handle color as a suffix to the part number:  $\mathbf{W}$  – white,  $\mathbf{B}$  – blue,  $\mathbf{G}$  – green,  $\mathbf{R}$  – red,  $\mathbf{Y}$  – yellow. **Example:** M6A-PR4-BNT-SS- $\mathbf{G}$ 

**Stainless Steel Directional Handles** – A stainless steel handle with the same design configuration as the standard nylon handle is available for the PR4 series. Add the designator –**ST** as a suffix to the part number.

Example: 4Q-PR4-EPRT-SS-ST

#### Introduction

Parker MB Series Ball Valves, with their rugged compact design, offer positive shut off or directional control of fluids in process, power and instrumentation applications. The unique one piece seat/packing design insures excellent sealing characteristics while accommodating a superior temperature range and cycle life.

These valves are available in two-way and three-way configurations, brass and stainless steel construction, with a wide variety of port connections. Also, all ports are suitable as inlets to full operating pressure of the valve.

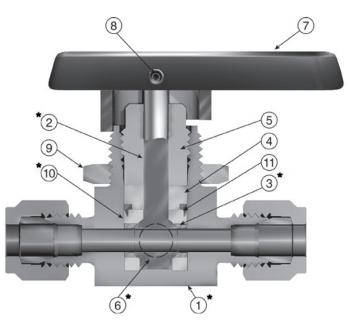

#### **Features**

- ► One piece seat/packing design
- ► Broad temperature range
- ► Coated metal inserts
- ► One piece stem/ball
- ► Wide variety of US Customary and SI ports
- ▶ Panel mountable to 1/4" thickness
- ▶ Bi-directional flow
- ► Handle indicates direction of flow
- ► Full operating pressure at any port
- Positive handle stops
- ► Color coded handles
- ▶ 100% factory tested
- Vent option
- ► Manual, electric or pneumatic actuation
- ► Leak-tight center-off position on three-way valves

| Materials      |  |
| Body           | two-way (in-line and angle)            |
| Configurations | 3-way, 4-way and 5-way                 |
| Port           | Tube compression (CPI™ / A-LOK®)       |
| Connections    | NPT (Male / Female)                    |
|                | BSP, VacuSeal and UltraSeal            |
| Port Size      | 1/16" to 3/4" and 3mm to 12mm          |
| Seat/Packing   | PFA-Perfluoroalkoxy                    |

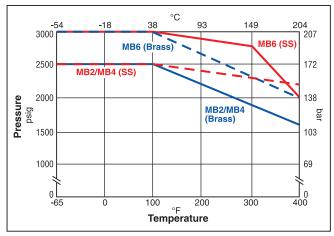

<sup>\*</sup> Preset from factory to 1000 psig (69 bar) bubble tight service. To achieve higher pressures packing nut must be tightened with Packing Tool MB6X5. Additional details are in INI-243 Installation Instructions. Packing in vented MB Series Ball Valves is factory adjusted for the maximum valve pressure rating of 500 psig (34 bar).

# Pressure vs. Temperature

NOTE: To determine MPa, multiply bar by 0.1

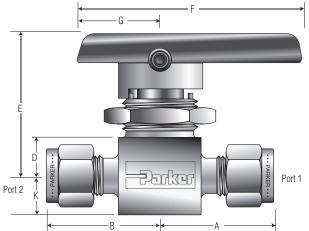

#### MB

# **Two-Way In-Line Dimensions, Flow Data**

## **Two-Way In-Line**

Vented - In off position the downstream port vents to atmosphere through a hole in the side of the body.

Model shown: 4A-MB6LPFA-SSP

- H Maximum Panel Thickness
- I Panel Hole Diameter
- J Body Width

<sup>\*</sup> Tested in accordance with ISA S75.02. Gas flow will be choked when  $P_1$  -  $P_2$  /  $P_1$  =  $x_T$ .

Dimensions in inches/millimeters are for reference only, subject to change.

<sup>†</sup> For CPI™ and A-LOK®, dimensions are measured with nuts in the finger tight position.

| M12Z   |        | 0.373 | 9.5   | 0.0  | 0.37             | 12mm CPI™      |                 | (44.5)         | (44.5)         | (44.5) |        |        |        |         |        |       |        |        |

<sup>\*</sup> Tested in accordance with ISA S75.02. Gas flow will be choked when  $P_1$  -  $P_2$  /  $P_1$  =  $x_T$ .

<sup>‡</sup> Not applicable for the two-way Angle pattern.

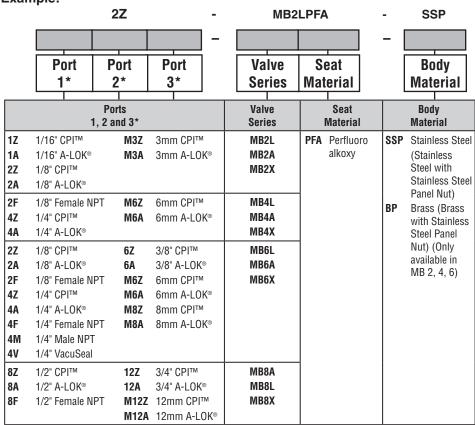

<sup>†</sup> For CPI™ and A-LOK®, dimensions are measured with nuts in the finger tight position.

# How to Order Two-Way In-Line, Two-Way Angle and Three-Way Patterns

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

The following example describes a MB Series, two-way, in-line pattern ball valve with 1/8" CPI™ compression end connections for ports 1 and 2 Inline

#### **Example:**

# How to Order Options (Two-Way, Angle, and Three-Way)

**Lock-Out Devices** – Add the suffix **-LD** to the end of the part number to order directly on the valve. **Example**: 2F-MB4LPFA-SSP**-LD**. For field installation, simply substitute the correct valve series number in the following nomenclature: **LD-**valve series. **Example**: **LD-**MB6L

**Colored Handles** – Add the designator corresponding to the correct handle as a suffix to the part number: **W** - white, **B** - blue, **G** - green, **R** - red, **Y** - yellow. **Example**: 4Z-MB6LPFA-SSP-**G** 

NOTE: Not offered in MB8 series.

Stainless Steel Handles - Add the suffix -ST to the part number. Example: 4F-MB6LPFA-SSP-ST (MB6 series only)

**Oval Handles** – Add the suffix **-S** to the part number. **Example**: 6Z-MB6APFA-SSP**-S**. If requesting a colored oval handle, add the suffix **-S**-color designator. **Example**: 6Z-MB6APFA-SSP**-S-W** 

NOTE: MB6 series only.

**Vented Valves** – Add the designator **V** after the **MB** in the part number for the vent option. **Example**: 2Z-MB**V**2XPFA-SSP.

Oxygen Cleaning – Add the suffix -C3 to the end of the part number to receive valves cleaned and assembled for oxygen service in accordance with Parker Specification ES8003. Example: 4A-MB4LPFA-SSP-C3

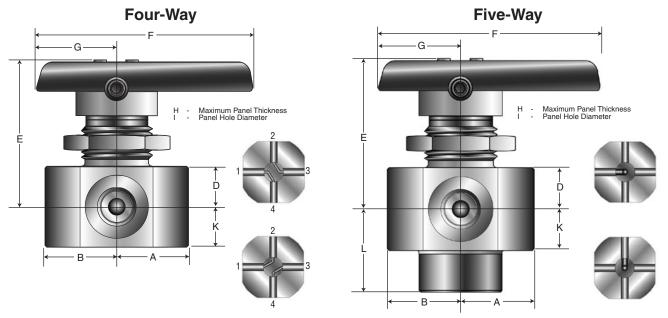

**Pneumatic Actuators** – For detailed actuator information, refer to the Pneumatic Actuators section of this catalog. For factory assembly, add the actuator part number as the suffix to the valve part number. **Example**: 4A-MB4LPFA-SSP-**61AC-2**. For field installation, specify the actuator desired. **Example**: **61AC-2**. The appropriate mounting hardware may be obtained by adding the valve series and actuator size to the prefix **MK-. Example**: **MK-**MB4L-61

**Electric Actuators** – For detailed actuator information, refer to the Electric Actuators section of this catalog. For factory assembly, add the actuator part number as the suffix to the valve part number. **Example**: M6A-MB6XPFA-SSP-71C. For field installation, specify the actuator desired. **Example**: 71C. The appropriate mounting hardware may be obtained by adding the valve series and actuator series to the prefix **MK-Example**: MK-MB6X-70

<sup>\*</sup> Valves with identical port connections for port 1 and port 2 require only one designator.

## **Dimensions, Flow Data**

<sup>\*</sup> Tested in accordance with ISA S75.02. Gas flow will be choked when  $P_1$  -  $P_2$  /  $P_1$  =  $x_T$ . † For CPI™ and A-LOK®, dimensions are measured with nuts in the finger tight position.

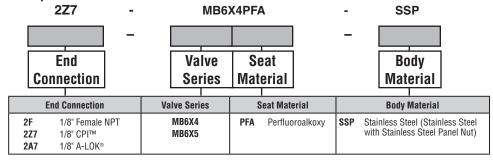

Dimensions in inches/millimeters are for reference only, subject to change.

# **How to Order Four-Way and Five-Way Patterns**

The correct part number is easily derived from the following example and ordering chart. The four product characteristics required are coded as shown in the chart.

The following example describes a MB-Series four-way pattern ball valve with 1/8" female CPI™ compression end connections for all ports, PFA seat and packing, stainless steel body construction, and a panel mounting nut.

#### **Example:**

# **How to Order Options**

**Colored Handles** – Add the designator corresponding to the correct handle as a suffix to the part number: **W** - white, **B** - blue, **G** - green, **R** - red, **Y** - yellow. **Example**: 2F-MB6X4PFA-SSP-**R** 

Stainless Steel Handles – Add the suffix -ST to the part number. Example: 2A7-MB6XPFA-SSP-ST

#### Introduction

Parker High Pressure HB4 Series Ball Valves provide reliable shut-off or switching functions. The upper and lower trunnion bearings enhance the resistance of the trunnions against seizure, and increase the valve life in extreme applications. The compact and rugged design employs spring-loaded seats for high cycle life and low operating torques at pressures up to 10,000 psig (689 bar).

#### **Features**

- ▶ PEEK trunnion bearings for longer cycle life
- ► Two-way and three-way designs
- Compact FNPT version for tight work areas
- ▶ Blow-out resistant two-piece ball/stem
- ► Full operating pressure at any port
- ► Low operating torque
- ▶ Manual, electric or pneumatic actuation
- ▶ Panel mountable to 3/8" (9.6mm) thickness
- ► No packing to adjust
- ► Color coded fracture resistant handles
- ▶ Handle indicates direction of flow
- ► Positive handle stops
- ▶ Wide variety of US customary and SI ports
- ▶ Top of stem marked to indicate flow direction
- ▶ 100% factory tested
- ▶ Compact package
- ▶ Heat code traceability

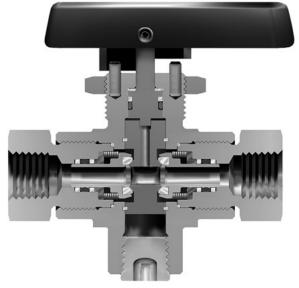

## **Specifications**

| Pressure<br>Rating                    | 10,000 psig (689 bar) CWP with PEEK<br>(PKR) Seats<br>6,000 psig (414 bar) CWP with PCTFE (K)<br>Seats |
|---------------------------------------|--|

| Port Size                             | 1/8" – 1/2" (6 mm to 12 mm)  |

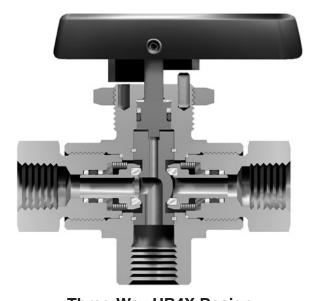

#### Flow Data

|                | Two-Way HB4L | Three-Way HB4X |
|----------------|--------------|----------------|
| C <sub>v</sub> | 1.02         | 0.62           |
| X <sub>T</sub> | 0.42         | 0.71           |
| Orifice        | 0.188"       | 0.188"         |
|                | (4.8mm)      | (4.8mm)        |

Tested in accordance with ISA S75.02. Gas flow will be choked when  $P_1$  -  $P_2$  /  $P_1$  =  $x_T$ .

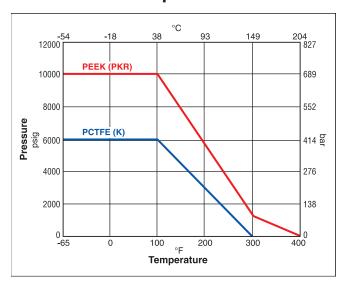

Two-Way HB4L Design

Three-Way HB4X Design

## **Pressure vs. Temperature**

Note: To determine MPa, multiply bar by 0.1

This pressure versus temperature chart reflects the maximum temperature range of indicated materials.

When combining seat and seal materials, the most restrictive temperature rating of the seats or seals becomes the limiting factor on valve temperature range.

#### **Temperature Ratings:**

| Nitrile (Nitrile) Rubber  | 40°F to 250°F    |
|---------------------------|------------------|
|                           | (-40°C to 121°C) |
| Ethylene Propylene Rubber | -65°F to 300°F   |
|                           | (-54°C to 149°C) |
| Fluorocarbon Rubber       | -15°F to 400°F   |
|                           | (-26°C to 204°C) |

<sup>\*</sup> Flow configurations are two-way (HB4L) and three-way (HB4X); Seat materials are PEEK (Polyetheretherketone) and PCTFE (Polychlorotrifluoroethylene).

Dimensions in inches/millimeters are for reference only, subject to change.

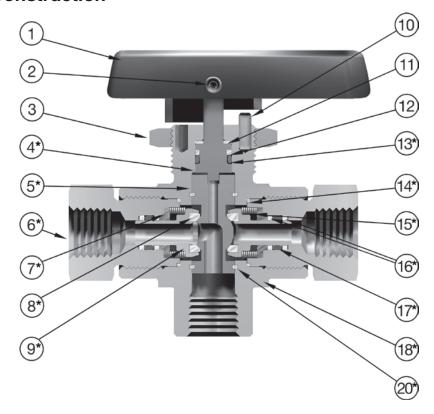

<sup>\*\*</sup> Designed with shorter end-to-end dimensions than the 4FL model to save space.

<sup>†</sup> Reduced pressure rating is determined by the maximum rated pressure of the tubing as stated in the Parker Instrument Tubing Selection Guide Bulletin 4200-TS. The working pressure ratings are limited by the seat material (PCTFE – 6,000 psig (414 bar) maximum and PEEK – 10,000 psig (689 bar) maximum) and the temperature of the application.

<sup>††</sup> For CPI™ and A-LOK®, dimensions are measured with nuts in the finger tight position.

# **Materials of Construction**

| No. | Part Description                | 6,000 psi (414 bar)   | 10,000 psi (689 bar)  |

<sup>\*</sup> Wetted parts

<sup>\*\*</sup> Optional elastomer seals available Lubrication: Perfluorinated polyether

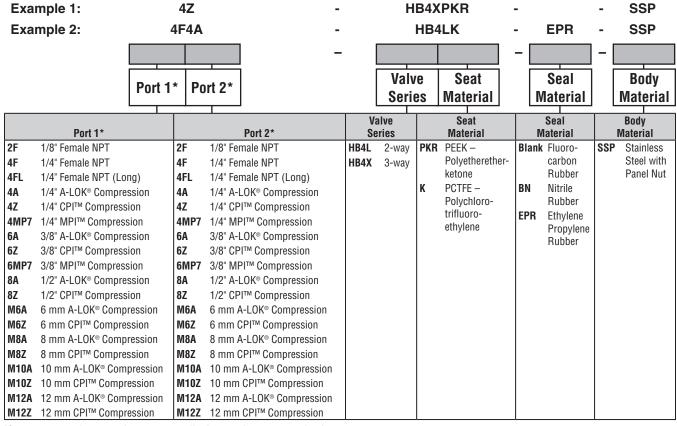

#### **How to Order**

The correct part number is easily derived from the following example and ordering chart. The five product characteristics required are coded as shown in the chart.

\*Note: If ports 1 and 2 are the same, eliminate the port 2 designator.

**Example 1** below describes a HB4X, three-way ball valve with 1/4" CPI™ compression end connections for ports 1 and 2, PEEK seats and fluorocarbon rubber seals, stainless steel body construction, and a panel mounting nut. Port 3 is always a 1/4" Female NPT port.

**Example 2** below describes a HB4L, two-way ball valve with a 1/4" female NPT port 1 and a 1/4" A-LOK® compression port 2, PCTFE seats and ethylene propylene rubber seals, stainless steel body construction, and a panel mounting nut. **Note:** Port 3 will always have a 1/4" Male NPT plug when ordering a HB4L Series two-way ball valve.

If ports 1 and 2 are the same, eliminate the port 2 designator.

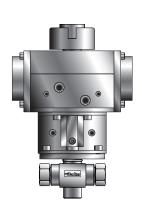

## **Actuator Options**

Double Acting (61AD)

Pneumatic Actuator

Spring Return (61AC, 61S & AO) Pneumatic Actuator

70, 80 & 90 Series Electric Actuator

# **How to Order Options**

**Lock-Out Devices** – Add the suffix **-LD** to the end of the part number to order directly on the valve.

Example: 2F-HB4LPKR-BN-SSP-LD

For field installation, simply substitute the correct valve series number after LD. Example: LD-HB4L

**Colored Handles** – Add the designator corresponding to the correct handle as a suffix to the part number:

**W** - white **B** - blue

Example: M6A-HB4XPKR-SSP-G

G - green R - red Y - yellow

Oxygen Cleaning – Add the suffix -C3 to the end of the part number to receive valves cleaned and assembled for oxygen service in accordance with Parker Specification ES8003.

Example: 4A-HB4LPKR-EPR-SSP-C3

**Pneumatic Actuators** – For detailed actuator information, refer to the Pneumatic Actuators section of this catalog. For factory assembly, add the actuator part number as the suffix to the valve part number.

Example: 4FL-HB4XK-SSP-61ACX-2

For field installation, specify the actuator desired. Example: 61ACX-2

The appropriate mounting hardware may be obtained by adding the valve series and actuator size to the prefix

MK-. Example: MK-HB4X-61

**Electric Actuators** – For detailed actuator information, refer to the Electric Actuators section of this catalog. For factory assembly, add the actuator part number as the suffix to the valve part number.

Example: 6A-HB4XPKR-SSP-71XA

For field installation, specify the actuator desired Example: 71XA

The appropriate mounting hardware may be obtained by adding the valve series and actuator series to the prefix **MK-**. **Example: MK-**HB4X-70

#### **How to Order Maintenance Kits**

Handle Kits: HB4-Handle-Color (Example: HB4-HANDLE-RED) - Consists of a red handle and handle screw.

**Two-way Seal Kits:** KIT-HB4LPKR-SS or KIT-HB4LK-SS – Consists of a two-way trunnion, springs, stem washers, stem seal, back-up ring, end connector seals, seat springs, seat retainer seals, seat retainer back-up rings, and seat assemblies.

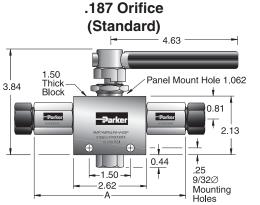

**Three-way Seal Kits:** KIT-HB4XPKR-SS or KIT-HB4XK-SS – Consists of a three-way trunnion, springs, stem washers and stem seal, back-up ring, end connector seals, seat springs, seat retainer seals, seat retainer back-up rings, and seat assemblies.

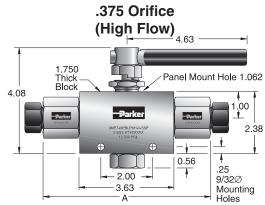

#### **MPB Series Valves**

Parker MPB series manually, pneumatically and electrically actuated two-way and three-way ball valves are designed for 1/4 and 1/2 turn media shutoff or switching applications up to 20,000 psi. Our trunion style ball design and spring loaded seats make the MPB series ideal for severe service applications. The end connector design enables a variety of end connections and combinations for specific customer applications.

## **How to Order MPB Series Valves**

The correct part number is easily derived from the following example and ordering chart. The nine product characteristics required are coded as shown in the chart.

The following example describes an MPB Series, three-way diverter ball valve with a .375" orifice, fluorocarbon rubber seals, 1/4" MPI medium pressure inverted connections on all ports and the optional lock out device.

#### **Example:**

# **How to Order Options**

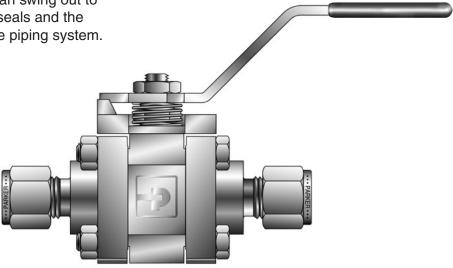

Lock Out Devices - add the suffix -LD to the end of the part number to order factory mounted on the valve.

**Actuated** – Contact factory for options.

#### Introduction

Parker's three-piece SWB Series Ball Valves are durable valves that can handle the pressure and piping loads. The center section can swing out to quickly and easily replace seats, seals and the ball without major disruption to the piping system.

Model Shown: 8Z-SWB8L-RT-BN-SS

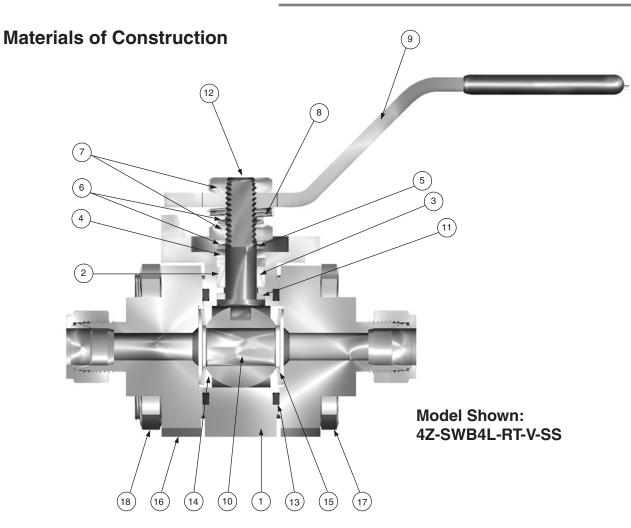

#### **Features**

- ► Ultra low internal volume
- Free floating ball design allows for seat wear compensation
- ► Self-compensating stem seal
- ► Spring-loaded seats
- ▶ Blow out resistant stem
- ▶ Fully enclosed body bolting
- ▶ Four bolt construction
- ► ISO-type actuator mounting design
- ▶ Pneumatic and electric actuation options
- ▶ 100% factory tested

## **Specifications**

 $<sup>\</sup>ensuremath{^{\star}}\xspace$  Optional body seal materials are described in the How to Order section.

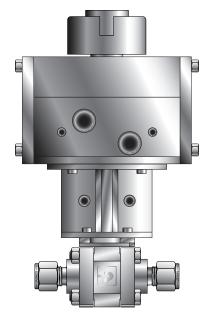

# Pressure vs. Temperature

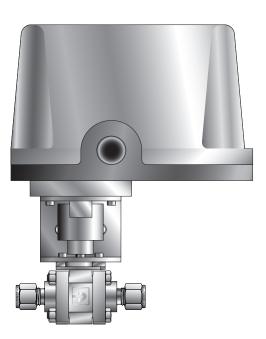

**Note:** This Pressure versus Temperature chart reflects the use of indicated seat materials in Stainless Steel valves without consideration of seal materials. When combining seat and seal materials, the most restrictive temperature rating of the seats or seals becomes the limiting factor on temperature range. Please refer to page 32 for seal temperature ranges.

| 16PBW1-SWB16L     | 0.88 | 22.4 | 35.0    | 0.29    | 1.81 | 46.0       | 1.81 | 46.0 |      |      |        |      |      |      |      |       |

Dimensions in inches/millimeters are for reference only, subject to change.

<sup>\*</sup> Tested in accordance with ISA S75.02. Gas flow will be choked when  $P_1$  -  $P_2/P_1 = x_T$ . † For CPI<sup>™</sup> and A-LOK®, dimensions are measured with nuts in the finger tight position.

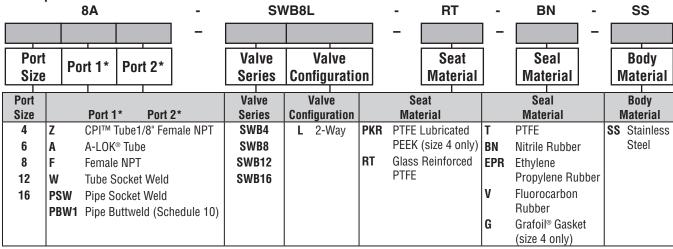

### **How to Order**

The correct part number is easily derived from the following example and ordering chart. The four product characteristics required are coded as shown in the chart.

The example below describes a SWB8L Two-Way Ball Valve with 1/2" A-LOK® end connections for ports 1 and 2, reinforced PTFE seats, Nitrile rubber body seals, and stainless steel construction.

\*Note: If ports 1 and 2 are the same, eliminate the port 2 designator.

#### **Example:**

If ports 1 and 2 are the same, eliminate the port 2 designator.

Note: Upper and Lower PTFE packing is replaced with PEEK when valves are ordered with Grafoil® Seals.

### Introduction

Parker 60 Series spring return (AC/AO) or double acting (AD) rack and pinion actuators are compact, simply designed devices that are quality engineered to provide high torque outputs and a high cycle, trouble-free life.

A compact, dual opposed rack and pinion design and guide band suspension combine to produce a symmetrically balanced, center mount actuator. In addition, the actuator has a short powerful stroke, rapid response, and fully concentric operating load capability which ensures optimum performance.

### **Features**

- Three point suspension system uses carbon filled PTFE guide bands for piston alignment and rack support
- Dual opposed piston design uses air pressure on two pistons to deliver a balanced force to the pinion gear
- Patented balanced piston design results in even distribution of bearing loads and eliminates piston tilting
- ▶ Multiple spring concept permits actuator use at 40 to 120 psig (2.8 to 8.3 bar) air supply requirements
- ► Suitable for use with dry or lubricated air, non-corrosive gas, or light hydraulic oil
- Aluminum alloy body construction with two component polyurethane coating
- ► Manual override

Pneu Act

# **Specifications**

### **Operating Pressure**

90° Models: 40 to 120 psig (2.8 to 8.3 bar) maximum

AC - Normally Closed Spring Return

AD - Double Acting

AO - Normally Open Spring Return

180° Models: 80 psig (5.5 bar) maximum

ACX - Spring Return

ADX – Double Acting

#### **Temperature Range**

-4°F to 175°F (-20°C to 79°C)

Optional high and low temperature ranges available

# **Options**

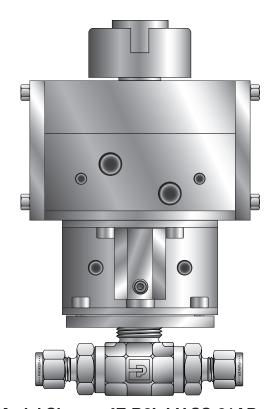

- ▶ Solenoid valve
- ► Rotary limit switch with valve position indicator
- ▶ Breather block
- ▶ Dual mount actuator

# 61S Option

- ► Compact single piston design
- ► Available for MB, HB, B2, and B6 Series Valves

# **Operation**

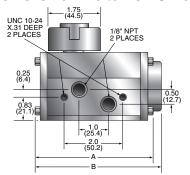

Actuators are manufactured with an integral air manifold and internal porting. The air manifold is designed for direct mounting of solenoid valves. This eliminates the need for external tubing and simplifies installation. For applications not requiring a solenoid valve, the air manifold inlet ports are marked "A" and "B". Air inlet port "A" will rotate the actuator counterclockwise. Spring return actuators fail clockwise.

### **How to Order Actuators**

### **Factory Assembled**

Add the actuator model designation as a suffix to the ball valve part number.

Example: 4Z-B6LJ2-SS-61AC-2. Describes a B6 ball valve with a normally closed actuator.

# For Field Assembly

Simply specify the actuator.

**Example:** 65AC-3. Mounting bracket kits are required when mounting actuators to valves.

# With Mounting Brackets

Specify the ball valve series and seat material followed by the actuator. **Examples:** B6LJ-61AO-2, MB6XPFA-61ACX, SWB12LRT-62AC-3

# **Options**

**High Temperature Seals** – Extends the high temperature from 175°F (79°C) to 250°F (121°C) and to 400°F (204°C) on special Series 62 and 63 90° models.

Low Temperature Seals – Extends the low temperature from –4°F (-20°C) to –40°F (-40°C).

**Solenoid Valve (Single coil)** – Mounts directly to the actuator inlet manifold. NEMA 4 or 7 housings with voltages of 24 VDC, 120 VAC, and 240 VAC. A manual override is standard.

**Limit Switch** – Rugged, fully enclosed unit contains two SPDT snap-acting switches operated by two independently adjustable cams on a rotating shaft coupled directly to the actuator auxiliary drive. Features a visual valve position indicator. Meets NEMA 4, 7, and 9 classifications for weather-resistant and hazardous locations.

**Breather Block** – A direct mount diverter module redirects instrument quality air to the spring chamber during the spring stroke (fail stroke) of AC and AO actuators. Ideal for corrosive, wet, or dusty environments. Also improves spring stroke speed and allows the solenoid valve to be mounted to it.

**Dual Mount Actuator** – Two valves may be actuated with a single actuator. Available with both valves open, both closed, or one open and one closed.

**NOTE:** Parker pneumatically actuated B Series Ball Valves should be ordered with elastometric stem packing and seals or the optional live-loaded PTFE packing. This reduces the need for any further packing adjustment after receipt from the factory.

# **How to Order Options**

**High Temperature Seals** – Add the suffix –**HT** to the end of the part number for service up to 250°F (121°C). Add the suffix –**HT4** to the end of the part number for service up to 400°F (204°C). **NOTE:** The –**HT4** option is only available on series 62 and 63 90° models. **Example:** 2F-HB4LK-BN-SS-61AD**-HT** 

**Low Temperature Seals** – Add the suffix **–LT** to the end of the part number.

Example: 4A-MB4LPFA-SS-61AC-2-LT

Accessories – Add one of the following suffixes to the end of the part number.

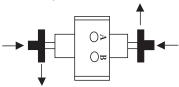

Example: 16F-SWB16L-RT-T-SS-63AC-3-2D

| Suffix        | Accessory   |
|---------------|---|

| -3E           | Breather Block, Limit Switch, Solenoid Valve, (NEMA 4, 240 VAC) |
| -3F           | Breather Block, Limit Switch, Solenoid Valve, (NEMA 7, 240 VAC) |

**Dual Mount Actuator** – Add **–DVM** as a suffix to the end of the part number.

Example: 6A-B6LPKR-SS-61AC-2-DVM

With DVM dual mount valve options, the following are standard arrangements: Two-way valves are provided in their failed position (in their closed position with AD actuators). Three-way valves are provided as shown below. Contact the factory for details on other available options.

# **How to Order Mounting Bracket Kits**

Add the valve series and actuator model designation as a suffix to **MK-**. **Example: MK-**MB4L-61S Describes a mounting kit for a MB Series ball valve with a 61S Series actuator.

### 70 Series

## **Specifications**

Voltage: 24, 115 or 230 VAC (50/60 Hz); 12 or 24 VDC

► Torque: 150, 300, 600 in lb (17, 34, 68 N m)

► Enclosure: PVC composite

▶ Duty cycle: 25% (VAC models); 100% (VDC models)

► Actuator bolt pattern: ISO standard (5211)

► Conduit connection: 1/2" NPT

► Output shaft: Male, zinc plated steel

► Temperature limits (all models): 32°F to 150°F (0°C to 66°C); (-40°F [-40°C] minimum with heater and thermostat)

#### **Features**

- ► Single direction actuation
- ▶ PVC cover resists damage/UV radiation
- ► NEMA 4 (weatherproof), 4X (weatherproof with corrosion resistance)
- Hardened steel spur gear drive train provides consistent, long life performance
- Permanently lubricated gear train and bearings
- Low profile design/direct drive male output permit limited space installation
- Available for the B Series, MB Series, HB Series and SWB Series ball valves
- ► Available for two-way (90°) and three-way (180°) configurations
- ► Approximate weight: 6 lb (2.7 kg)
- ► CSA certified (Standard)
- ► Two Limit Switches: Single pole, double throw, rated for 1/3 HP, 10 amps @ 125/230 VAC, CSA certified

### **Options**

- ► Additional limit switches and cams (specify up to 2)
- ► Heater and thermostat (For operation to -40°F [-40°C])

Model Shown: 4F-B6XJ-SS-71XA

### 70R Series

### **Specifications**

Same as 70 series

#### **Features**

▶ Bi-directional (reversing) actuation

### **Options**

▶ Same as 70 Series

#### **Additional Options**

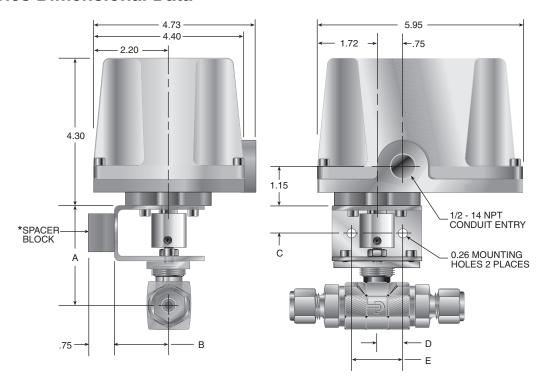

- Additional limit switches and cams (specify up to 2)
- Position indicator
- Valve position indication

**Note:** Cycle times reflect 90° rotation. For 180° rotation, double the cycle time. \*\*12 VDC not available with this model.

#### 80 Series

### **Specifications**

► Voltage: 115 or 230 VAC (50/60 Hz)

► Torque: 150, 300, 600 in lb (17, 34, 68 Nm)

► Enclosure: Epoxy coated cast aluminum

▶ Duty cycle: 75%

► Actuator bolt pattern: ISO standard (5211)

► Conduit connection: 1/2" NPT (2 places)

▶ Output drive: ISO compatible female drive output

► Temperature limits (all models): 32°F to 150°F (0°C to 66°C); (-40°F [-40°C] minimum with heater and thermostat)

#### **Features**

- ▶ Bi-directional actuation
- ► Mother/daughter board, modular electronics technology
- Circuit board readily accepts plug-in connectors
- Variety of plug-in accessory boards are available
- ► Easy installation, no hard-wiring required
- ▶ NEMA 4 (weatherproof), 4X (weatherproof with corrosion resistance), NEMA 7 (explosion proof, gases) & 9 (explosion proof, dust) – Class I, Div. I, Groups C & D; Class II, Div. I, Groups E, F, and G; Class III
- ► Highly efficient spur gear power train
- ▶ Lubrication: Permanently lubricated gear train and bearings
- ► Manual override
- ► Visual position indicator
- Available for the B Series, MB Series, HB Series and SWB Series ball valves
- ► Available for two-way (90°) and three-way (180°) configurations
- ► Approximate weight: 17 lb (7.7 kg)
- ► CSA certified (Option)
- ➤ Two Limit Switches: Single pole, double throw, rated for 1/3 HP, 10 amps @ 125/230 VAC, CSA certified

#### **Options**

- ▶ Additional limit switches and cams (specify up to 2)
- ► Heater and thermostat (For operation to -40°F [-40°C])
- CSA Certified

Model Shown: 8W-SWB8L-RT-V-SS-81CS2

### **Materials of Construction**

| Part         | Material               |
|--------------|------------------------|
| Cover        | Diecast aluminum alloy |
| Base         | Diecast aluminum alloy |
| Gear Train   | Hardened steel         |
| Output Shaft | N/A                    |
| Finish       | Powder coated epoxy    |

# **Testing**

#### **Actuator**

All 70 and 80 Series Electric Actuators are factory tested for accurate cycle times and correct output signals at all applicable positions.

#### Valve

All valves are factory tested for internal and external leakage as described in their respective catalogs.

#### **Valve / Actuator Assemblies**

All valve/actuator assemblies are factory tested for proper valve actuation.

# **Specifications**

- Voltage: 24 VAC (50/60 Hz), 12 or 24 VDC
   Torque: 150, 300, 600 in lb (17, 34, 68 Nm)
- ► Enclosure: Epoxy coated cast aluminum
- Duty cycle: Continuous (after 1 hour duty cycle is reduced to 80%)
- ► Actuator bolt pattern: ISO standard (5211)
- ► Conduit connection: 3/4" NPT (3/4" to 1/2" reducing bushings included)
- ► Output drive: Square female drive output
- ► Temperature limits (all models): 32°F to 130°F (0°C to 54°C); (-40°F [-40°C] minimum with heater and thermostat)

#### **Features**

- ▶ Bi-directional actuation
- ▶ Mother/daughter board, modular electronics technology
- ► Circuit board readily accepts plug-in connectors
- ▶ Variety of plug-in accessory boards are available
- ► Easy installation, no hard-wiring required
- NEMA 4 (weatherproof), 4X (weatherproof with corrosion resistance), NEMA 7 (explosion proof, gases) & 9 (explosion proof, dust) − Class I, Div. I, Groups C & D; Class II, Div. I, Groups E, F, and G; Class III
- ► Highly efficient spur gear power train
- ▶ Lubrication: Permanently lubricated gear train and bearings
- Position feedback and holding brake to prevent back-driving on all models
- ▶ Visual position indicator
- ► Available for the B Series, MB Series, HB Series and SWB Series ball valves
- Available for two-way (90°) and three-way (180°) configurations
- ► Approximate weight: 17 lb (7.7 kg); Model 94 weighs 31 lb (14.1 kg)
- ► Two Limit Switches: Single pole, double throw, rated for 1/2 HP, 15 amps @ 125 VAC, CSA certified

## **Options**

- ▶ Two additional limit switches and cams
- ► Heater and thermostat (For operation to -40°F [-40°C])
- Back-up powered control board

NOTE: Cycle times reflect  $90^\circ$  rotation. For  $180^\circ$  rotation, double the cycle time.

**Duty Cycle:** The percentage of time an electric actuator may operate in relation to the time it must rest. It equals "on time" divided by total elapsed time, multiplied by 100. For example, an actuator with a duty cycle of 25% and a cycle time of five seconds must rest for 15 seconds before operating again.

<sup>\*\*</sup>Amps rated at full running torque. Amp draws shown are for 115 VAC and 12VDC only. For other voltages, consult the factory. †24 VDC cycle time and amp draw are half of 12 VDC.

**NOTE:** Mounting bracket kits include one mounting bracket, one nut plate, one coupling, six socket head cap screws, and two set screws.

If the bracket spacer block is required, order separately using the following nomenclature:

SPACER-ACT-.75

**How To Order Actuators With Mounting Brackets:**Specify the ball valve series and seat material followed

by the actuator.

Examples: B6LJ-71C

MB6XPFA-71RX, SWB12LRT-73CS1

**NOTE:** For the SWB Series, actuators can be down sized to fit the application. The actuator selection tables utilize valve combinations at full operating pressures.

| Positioner (4-20mA, 115 VAC)   | Not Available            | KIT-POSITIONER-420-115AC | KIT-POSITIONER-420-115AC |
| Positioner (0-10 VDC, 115 VAC) | Not Available            | KIT-POSITIONER-010-115AC | KIT-POSITIONER-010-115AC |

<sup>\*</sup>Heater and thermostat for DC voltages are factory installed only.

### **How to Order**

# **Electric Actuators for Field Assembly**

The correct part number is easily derived from the following example and ordering chart. The four product characteristics required are coded as shown in the chart.

Example 1, below, describes a Model 71, two-way electric actuator unit with a NEMA 4 and 4X rating, a 115 VAC motor with optional heater and thermostat.

Example 2, below, describes a Model 91, two-way electric actuator unit with 12 VDC power supply and on/off Control Board with optional heater and thermostat.

Example 1: 71 - T

Example 2: 91C - T

NOTE: Mounting bracket kits are required when ordering actuators for field assembly.

<sup>\*</sup> Not available in the 71 Series.

<sup>\*\*</sup> CSA – Standard on 70 Series, optional on 80 Series, not available on 90 Series.

# **How to Order (Continued)**

# **Electric Actuators for Factory Assembly**

The correct part number is easily derived from the following example and ordering chart. The five product characteristics required are coded as shown in the chart.

The example below describes a Model 81, three-way electric actuator unit with a NEMA 4, 4X, 7 and 9 rating, a 230 VAC motor and no options, mounted on a MB Series ball valve.

Example: 4Z-MB6XPFA-SS - 81XA

**NOTE:** Parker electrically actuated, B Series Ball Valves should be ordered with elastometric stem packing and seals or the optional live-loaded PTFE packing. This reduces the need for any further packing adjustment after receipt from the factory.

\* Not available in the 71 Series.

<sup>\*\*</sup> CSA – Standard on 70 Series, optional on 80 Series, not available on 90 Series.

Parker's LB Series Low Pressure Ball Valve offers quick, quarter turn shut-off capability for chemical, petrochemical, oil & gas, pulp & paper, and instrumentation applications. The LB Series is designed with integral compression end connections to eliminate the need for additional tube to pipe unions. With its blow out resistant stem standard locking level handle and integral compression end connections, the LB Series is an excellent, cost effective choice for tubing applications ranging in size from 1/4" to 1".

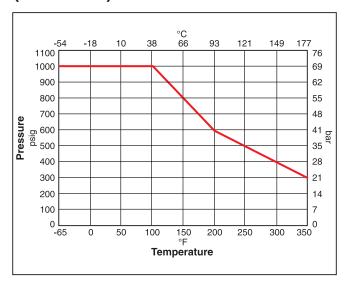

### **Features**

- ► Integral compression end connections
- ▶ Blow-out resistant stem
- ► Positive handle stops
- ► Locking lever handle
- ► Straight through flow path
- ► Stainless stell construction

### **How to Order**

The correct part number is easily derived from the following example and ordering chart. The four product characteristics required are coded as shown in the chart.

The example below describes a two-way, stainless steel LB4 series ball valve with 1/4" CPI™ inlet and outlet compression ports, PTFE seats and packing, and stainless steel body construction.

| Example: | 4Z                | - | LB4L            | - | Т                | - | SS                  |  |  |

### Introduction

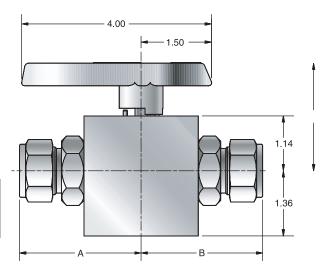

Parker's manually and pneumatically actuated two-way B12 Series Ball Valves provide quick 1/4 turn on-off control of fluids used in process and instrumentation applications.

### **Features**

- ▶ Blow-out resistant stem
- ► Spring-loaded ball seats
- ▶ Bi-directional flow
- ► Stainless steel construction
- ▶ Micro-finished ball provides positive seal
- ► Handle indicates flow direction
- ► Color coded handles
- ► Low operating torques
- ► Optional pneumatic actuation
- ▶ 100% factory tested

Lubrication: Perfluorinated Polyether

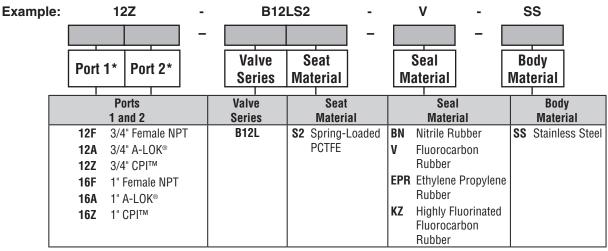

**B12** 

### **How to Order**

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

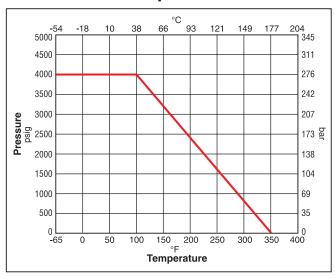

The example below describes a B12 Series, two-way, in-line pattern ball valve with 3/4" CPI™ compression end connections for ports 1 and 2, spring loaded PCTFE seats, fluorocarbon rubber seals, and stainless steel body construction

\*Note: If ports 1 and 2 are the same, eliminate the port 2 designator.

<sup>\*</sup> If ports 1 and 2 are the same, eliminate the port 2 designator.

# Pressure vs. Temperature

### **Available End Connections**

### **Standard End Connections**

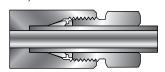

A - Two ferrule A-LOK® compression port

M - ANSI/ASME B1.20.1 external pipe threads

MP7 - Parker MPI™ (Medium Pressure Inverted) To 15,000 PSI

**Z** - Single ferrule CPI<sup>™</sup> compression port

Q - UltraSeal face seal port

**F** - ANSI/ASME B1.20.1 internal pipe threads

V - VacuSeal face seal port

#### **Non-Standard End Connections**

Not available on all valve series. Please consult factory for availability.

TA - Tube adapter connection

End Conn

L - SAE J1453, Fitting – O-ring face seal – External thread with O-ring groove designed to seal with an elastomer against a sleeve

**F5** - SAE J1926/2, Part 2: Heavy-duty (S Series) stud ends

**KF** - British Standard BS 21 (ISO 7-1), Internal pipe threads

**G5** - SAE J1926/1, Part 1: Threaded port with O-ring seal in truncated housing

**KM** - British Standard BS 21 (ISO 7-1), External pipe threads

Catalog 4121-BV Offer of Sale

#### Offer of Sale

The items described in this document and other documents and descriptions provided by Parker Hannifin Corporation, its subsidiaries and its authorized distributors ("Seller") are hereby offered for sale at prices to be established by Seller. This offer and its acceptance by any customer ("Buyer") shall be governed by all of the following Terms and Conditions. Buyer's order for any item described in its document, when communicated to Seller verbally, or in writing, shall constitute acceptance of this offer. All goods or work described will be referred to as "Products".

- 1. Terms and Conditions. Seller's willingness to offer Products, or accept an order for Products, to or from Buyer is expressly conditioned on Buyer's assent to these Terms and Conditions and to the terms and conditions found on-line at www.parker.com/saleterms/. Seller objects to any contrary or additional term or condition of Buyer's order or any other document issued by Buyer.
- 2. Price Adjustments; Payments. Prices stated on the reverse side or preceding pages of this document are valid for 30 days. After 30 days, Seller may change prices to reflect any increase in its costs resulting from state, federal or local legislation, price increases from its suppliers, or any change in the rate, charge, or classification of any carrier. The prices stated on the reverse or preceding pages of this document do not include any sales, use, or other taxes unless so stated specifically. Unless otherwise specified by Seller, all prices are F.O.B. Seller's facility, and payment is due 30 days from the date of invoice. After 30 days, Buyer shall pay interest on any unpaid invoices at the rate of 1.5% per month or the maximum allowable rate under applicable law.
- 3. Delivery Dates; Title and Risk; Shipment. All delivery dates are approximate and Seller shall not be responsible for any damages resulting from any delay. Regardless of the manner of shipment, title to any products and risk of loss or damage shall pass to Buyer upon tender to the carrier at Seller's facility (i.e., when it's on the truck, it's yours). Unless otherwise stated, Seller may exercise its judgment in choosing the carrier and means of delivery. No deferment of shipment at Buyers' request beyond the respective dates indicated will be made except on terms that will indemnify, defend and hold Seller harmless against all loss and additional expense. Buyer shall be responsible for any additional shipping charges incurred by Seller due to Buyer's changes in shipping, product specifications or in accordance with Section 13, herein.
- 4. Warranty. Seller warrants that the Products sold here-under shall be free from defects in material or workmanship for a period of twelve months from the date of delivery to Buyer or 2,000 hours of normal use, whichever occurs first. This warranty is made only to Buyer and does not extend to anyone to whom Products are sold after purchased from Seller. The prices charged for Seller's products are based upon the exclusive limited warranty stated above, and upon the following disclaimer: DISCLAIMER OF WARRANTY: THIS WARRANTY COMPRISES THE SOLE AND ENTIRE WARRANTY PERTAINING TO PRODUCTS PROVIDED HEREUNDER. SELLER DISCLAIMS ALL OTHER WARRANTIES, EXPRESS AND IMPLIED, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.
- **5. Claims; Commencement of Actions.** Buyer shall promptly inspect all Products upon delivery. No claims for shortages will be allowed unless reported to the Seller within 10 days of delivery. No other claims against Seller will

- be allowed unless asserted in writing within 60 days after delivery or, in the case of an alleged breach of warranty, within 30 days after the date within the warranty period on which the defect is or should have been discovered by Buyer. Any action based upon breach of this agreement or upon any other claim arising out of this sale (other than an action by Seller for any amount due to Seller from Buyer) must be commenced within thirteen months from the date of tender of delivery by Seller or, for a cause of action based upon an alleged breach of warranty, within thirteen months from the date within the warranty period on which the defect is or should have been discovered by Buyer.
- 6. LIMITATION OF LIABILITY. UPON NOTIFICATION, SELLER WILL, AT ITS OPTION, REPAIR OR REPLACE A DEFECTIVE PRODUCT, OR REFUND THE PURCHASE PRICE. IN NO EVENT SHALL SELLER BE LIABLE TO BUYER FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF, OR AS THE RESULT OF, THE SALE, DELIVERY, NON-DELIVERY, SERVICING, USE OR LOSS OF USE OF THE PRODUCTS OR ANY PART THEREOF, OR FOR ANY CHARGES OR EXPENSES OF ANY NATURE INCURRED WITHOUT SELLER'S WRITTEN CONSENT, EVEN IF SELLER HAS BEEN NEGLIGENT, WHETHER IN CONTRACT, TORT OR OTHER LEGAL THEORY. IN NO EVENT SHALL SELLER'S LIABILITY UNDER ANY CLAIM MADE BY BUYER EXCEED THE PURCHASE PRICE OF THE PRODUCTS.
- **7. Contingencies.** Seller shall not be liable for any default or delay in performance if caused by circumstances beyond the reasonable control of Seller.
- 8. User Responsibility. The user, through its own analysis and testing, is solely responsible for making the final selection of the system and Product and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application and follow applicable industry standards and Product information. If Seller provides Product or system options, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the Products or systems.
- **9. Loss to Buyer's Property.** Any designs, tools, patterns, materials, drawings, confidential information or equipment furnished by Buyer or any other items which become Buyer's property, may be considered obsolete and may be destroyed by Seller after two consecutive years have elapsed without Buyer placing an order for the items which are manufactured using such property. Seller shall not be responsible for any loss or damage to such property while it is in Seller's possession or control.
- **10. Special Tooling.** A tooling charge may be imposed for any special tooling, including without limitation, dies, fixtures, molds and patterns, acquired to manufacture Products.

Offer of Sale Catalog 4121-BV

Such special tooling shall be and remain Seller's property notwithstanding payment of any charges by Buyer. In no event will Buyer acquire any interest in apparatus belonging to Seller which is utilized in the manufacture of the Products, even if such apparatus has been specially converted or adapted for such manufacture and notwithstanding any charges paid by Buyer. Unless otherwise agreed, Seller shall have the right to alter, discard or otherwise dispose of any special tooling or other property in its sole discretion at any time.

- 11. Buyer's Obligation; Rights of Seller. To secure payment of all sums due or otherwise, Seller shall retain a security interest in the goods delivered and this agreement shall be deemed a Security Agreement under the Uniform Commercial Code. Buyer authorizes Seller as its attorney to execute and file on Buyer's behalf all documents Seller deems necessary to perfect its security interest. Seller shall have a security interest in, and lien upon, any property of Buyer in Seller's possession as security for the payment of any amounts owed to Seller by Buyer.
- 12. Improper use and Indemnity. Buyer shall indemnify, defend, and hold Seller harmless from any claim, liability, damages, lawsuits, and costs (including attorney fees), whether for personal injury, property damage, patent, trademark or copyright infringement or any other claim, brought by or incurred by Buyer, Buyer's employees, or any other person, arising out of: (a) improper selection, improper application or other misuse of Products purchased by Buyer from Seller; (b) any act or omission, negligent or otherwise, of Buyer; (c) Seller's use of patterns, plans, drawings, or specifications furnished by Buyer to manufacture Product; or (d) Buyer's failure to comply with these terms and conditions. Seller shall not indemnify Buyer under any circumstance except as otherwise provided.
- 13. Cancellations and Changes. Orders shall not be subject to cancellation or change by Buyer for any reason, except with Seller's written consent and upon terms that will indemnify, defend and hold Seller harmless against all direct, incidental and consequential loss or damage. Seller may change product features, specifications, designs and availability with notice to Buyer.
- **14. Limitation on Assignment.** Buyer may not assign its rights or obligations under this agreement without the prior written consent of Seller.
- **15. Entire Agreement.** This agreement contains the entire agreement between the Buyer and Seller and constitutes the final, complete and exclusive expression of the terms of the agreement. All prior or contemporaneous written or oral agreements or negotiations with respect to the subject matter are herein merged.
- **16. Waiver and Severability.** Failure to enforce any provision of this agreement will not waive that provision nor will any such failure prejudice Seller's right to enforce that provision in the future. Invalidation of any provision of this agreement by legislation or other rule of law shall not invalidate any other provision herein. The remaining provisions of this agreement will remain in full force and effect.
- **17. Termination.** This agreement may be terminated by Seller for any reason and at any time by giving Buyer thirty (30) days written notice of termination. In addition, Seller may

by written notice immediately terminate this agreement for the following: (a) Buyer commits a breach of any provision of this agreement (b) the appointment of a trustee, receiver or custodian for all or any part of Buyer's property (c) the filing of a petition for relief in bankruptcy of the other Party on its own behalf, or by a third party (d) an assignment for the benefit of creditors, or (e) the dissolution or liquidation of the Buyer.

- 18. Governing Law. This agreement and the sale and delivery of all Products hereunder shall be deemed to have taken place in and shall be governed and construed in accordance with the laws of the State of Ohio, as applicable to contracts executed and wholly performed therein and without regard to conflicts of laws principles. Buyer irrevocably agrees and consents to the exclusive jurisdiction and venue of the courts of Cuyahoga County, Ohio with respect to any dispute, controversy or claim arising out of or relating to this agreement. Disputes between the parties shall not be settled by arbitration unless, after a dispute has arisen, both parties expressly agree in writing to arbitrate the dispute.
- 19. Indemnity for Infringement of Intellectual Property Rights. Seller shall have no liability for infringement of any patents, trademarks, copyrights, trade dress, trade secrets or similar rights except as provided in this Section. Seller will defend and indemnify Buyer against allegations of infringement of U.S. patents, U.S. trademarks, copyrights, trade dress and trade secrets ("Intellectual Property Rights"). Seller will defend at its expense and will pay the cost of any settlement or damages awarded in an action brought against Buyer based on an allegation that a Product sold pursuant to this Agreement infringes the Intellectual Property Rights of a third party. Seller's obligation to defend and indemnify Buyer is contingent on Buyer notifying Seller within ten (10) days after Buyer becomes aware of such allegations of infringement, and Seller having sole control over the defense of any allegations or actions including all negotiations for settlement or compromise. If a Product is subject to a claim that it infringes the Intellectual Property Rights of a third party, Seller may, at its sole expense and option, procure for Buyer the right to continue using the Product, replace or modify the Product so as to make it noninfringing, or offer to accept return of the Product and return the purchase price less a reasonable allowance for depreciation. Notwithstanding the foregoing, Seller shall have no liability for claims of infringement based on information provided by Buyer, or directed to Products delivered hereunder for which the designs are specified in whole or part by Buyer, or infringements resulting from the modification, combination or use in a system of any Product sold hereunder. The foregoing provisions of this Section shall constitute Seller's sole and exclusive liability and Buyer's sole and exclusive remedy for infringement of Intellectual Property Rights.
- **20. Taxes.** Unless otherwise indicated, all prices and charges are exclusive of excise, sales, use, property, occupational or like taxes which may be imposed by any taxing authority upon the manufacture, sale or delivery of Products.
- **21. Equal Opportunity Clause.** For the performance of government contracts and where dollar value of the Products exceed \$10,000, the equal employment opportunity clauses in Executive Order 11246, VEVRAA, and 41 C.F.R. §§ 60-1.4(a), 60-741.5(a), and 60-250.4, are hereby incorporated.

# Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 1-800-C-Parker.

#### AEROSPACE

#### **Key Markets**

- Aircraft engines
- Business & general aviation
- Commercial transports
- Land-based weapons systems
- Military aircraft
- Missilés & launch vehicles
- Regional transports
- Unmanned aerial vehicles

#### **Key Products**

- Flight control systems & components
- Fluid conveyance systems
- Fluid metering delivery & atomization devices
- Fuel systems & components
- Hydraulic systems & components
- Inert nitrogen generating systems
- Pneumatic systems & components
- Wheels & brakes

#### **CLIMATE CONTROL**

#### **Key Markets**

- Agriculture
- Air conditioning
- Food, beverage & dairy
- Life sciences & medical
- Precision cooling
- Processing
- Transportation

#### **Key Products**

- CO2 controls Electronic controllers
- Filter driers
- Hand shut-off valves
- Hose & fittings
- Pressure regulating valves
- Refrigerant distributors Safety relief valves
- Solenoid valves
- Thermostatic expansion valves

#### **ELECTROMECHANICAL**

#### **Key Markets**

- Aerospace
- Factory automation
- Life science & medical
- Machine tools
- Packaging machinery
- Paper machinery
- Plastics machinery & converting
- Primary metals
- Semiconductor & electronics
- Textile
- Wire & cable

#### **Key Products**

- AC/DC drives & systems
- Electric actuators, gantry robots Electrohydrostatic actuation systems
- Electromechanical actuation systems
- Human machine interface
- Linear motors
- Stepper motors, servo motors, drives & controls
- Structural extrusions

#### FILTRATION

#### **Key Markets**

- Food & beverage Industrial machinery
- Life sciences
- Marine
- Mobile equipment
- Oil & gas
- Power generation
- Process Transportation

#### **Key Products**

- Analytical gas generators
- Compressed air & gas filters
- Condition monitoring
- Engine air, fuel & oil filtration & systems
- Hydraulic, lubrication & coolant filters
- Process, chemical, water & microfiltration filters
- Nitrogen, hydrogen & zero air generators

#### **FLUID & GAS HANDLING**

#### **Kev Markets**

- Aerospace
- Agriculture
- Bulk chemical handling
- Construction machinery
- Food & beverage
- Fuel & gas delivery
- Industrial machinery
- Mobile Oil & gas
- Transportation
- Welding

### **Key Products**

- Brass fittings & valves
- Diagnostic equipment
- Fluid conveyance systems
- Industrial hose PTFE & PFA hose, tubing & plastic fittings
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters
- Quick disconnects

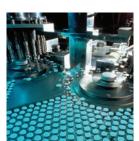

#### **HYDRAULICS**

#### **Kev Markets**

- Aerospace
- Aerial lift
- Agriculture Construction machinery
- Industrial machinery
- Mining
- Power generation & energy
- Truck hydraulics

#### **Key Products**

- Diagnostic equipment
- Hydraulic cylinders & accumulators
- Hydraulic motors & pumps
- Hydraulic systems
- Hydraulic valves & controls Power take-offs
- Rubber & thermoplastic hose & couplings
- Tube fittings & adapters Quick disconnects

## **PNEUMATICS**

#### **Key Markets**

- Aerospace
- Conveyor & material handling
- Factory automation
- Life science & medical Machine tools
- Packaging machinery
- Transportation & automotive

### **Key Products**

- Air preparation
- Brass fittings & valves
- Manifolds
- Pneumatic accessories
- Pneumatic actuators & grippers
- Pneumatic valves & controls Quick disconnects
- Rotary actuators
- Rubber & thermoplastic hose
- & couplings Structural extrusions
- Thermoplastic tubing & fittings
- Vacuum generators, cups & sensors

#### PROCESS CONTROL

#### **Key Markets**

- Chemical & refining
- Food, beverage & dairy
- Medical & dental
- Microelectronics Oil & gas

#### **Key Products** Analytical sample conditioning products

Power generation

- & systems Fluoropolymer chemical delivery fittings, valves
- & numps High purity gas delivery
- fittings, valves & regulators Instrumentation fittings.
- valves & regulators Medium pressure fittings
- & valves Process control manifolds

# **SEALING & SHIELDING**

### **Key Markets**

- Aerospace
- Chemical processing Consumer
- Energy, oil & gas Fluid power General industrial
- Information technology
- Life sciences
- Military
- Semiconductor
- Telecommunications Transportation

#### **Key Products**

- Dynamic seals Elastomeric o-rings
- EMI shielding Extruded & precision-cut,
- fabricated elastomeric seals Homogeneous & inserted elastomeric
- shapes
- High temperature metal seals Metal & plastic retained composite seals
- Thermal management

# Sales Offices Worldwide
